SKILLS

HTML / CSS

JQuery

AngularJS

Bootstrap

Though I am a student by day, web development keeps me going through the night. I have been completely immersed in user interface, and have worn the entrepreneurship hat for a little while. I would like to make your user experience more beautiful, win the eyes and hearts of customers, one pixel at a time.

PERSONAL STATEMENT

As a current undergraduate from the National University of Singapore, with a good track record for doing web development work for startups incubated here, I have undertaken several internships that enabled me to synthesize customer needs and business requirements. These experiences have honed my web development skills, using as little resources to create the biggest impact in user experience. When it comes to user experience, getting them from point A to B is no longer good enough - we will fly them there in a private jet.

Specializing in front-end web development, Twitter Bootstrap, JQuery and AngularJS are the tools of my trade, but I am always ready to pick up new and better tools to suit the project. Learning a new framework has always been exciting, and I will look forward to learning and using them well in as little time possible.

I have created customizable and informative profile pages, an enterprise edition of a rising Business-to-Business platform here in Singapore and developed new user interfaces upon existing processes for the same startup. Since then, we have had successful rounds of presentations to existing and potential investors both locally and internationally, ending the seed round of funding at just over \$250,000 with the rest of the amazing team. Most of my work involves striking a balance between investor requests, business requirements and all out amazing user interfaces, and finding that balance is always different for each company. I hope to help you find that balance in whatever way that I may be of use, while making interfaces that your customers will come back for.

Rolling up my sleeves and just doing the work is always exciting in an environment like this, I know what it means to make something work, and all the effort that goes into the dream. When it comes to front-end design and development internships, I have been there, done that, and I am back for more.

I would love to be working alongside an amazing team, who shares the motivation needed for those late night hackathons and accomplish work that we can be proud of in the morning. Please feel free to take a look at my GitHub page and if you find yourself interested in making this happen, let us get in touch.

EDUCATION

Aug 2015 - Present	National University of Singapore Bachelor of Computing (Honors) in Information Systems (Course details in Appendix A)	Singapore
--------------------	--	-----------

WORK EXPERIENCE

Dec 2016 – March 2017	ThunderQuote <i>Front-end Developer Intern</i> <ul style="list-style-type: none">• Re-designed and developed existing user-experience• Designed and developed Enterprise project• Automation of business processes	Singapore
May 2016 – Jul 2016	National University of Singapore Orbital Program <i>Full Stack Developer</i> <ul style="list-style-type: none">• Games to help the elderly with dementia• Worked with online databases• Applied analytics to dynamically adjust difficulty with each play	Singapore
Oct 2015 – Jan 2016	RisinGreen Technologies <i>Front-end Developer Intern</i> <ul style="list-style-type: none">• Designed and developed profile pages and homepages (Testimonial in Appendix B)	Singapore
May 2015 – July 2015	First Code Academy Programming Instructor Intern <ul style="list-style-type: none">• Taught html, JavaScript and CSS	Singapore

ACHIEVEMENTS

Aug 2016 - Present	Scholarship Industry Preparation for Pre-graduate (iPREP) Program	Singapore
Mar 2016	Singapore Airlines App Challenge	Singapore
August 2015	Ideas Inc. Singapore business plan competition	Singapore
July 2015	Angel Hack Singapore	Singapore
May 2013 – Mar 2015	Military Service (Artillery) <ul style="list-style-type: none">• Detachment Commander (2nd in Charge) (May 2014)• Chief of Artillery Coin Award Recipient – Outstanding Service	Singapore
Feb 2010 - Dec 2012	Raffles Junior College <ul style="list-style-type: none">• Outstanding Student Award for leadership qualities• Raffles Diploma – Merit Award• Junior College Division Badminton – National Champion (2012)	Singapore

SKILLS AND PROFICIENCIES

Web	HTML, CSS Twitter Bootstrap Ionic Hybrid App development Ruby on Rails Sketch	Proficient Proficient Intermediate Basic Basic
Scripting	JavaScript jQuery AngularJS 1.x	Proficient Proficient Proficient
Database	MySQL, PostgreSQL DBMS SQL	Intermediate Intermediate
Programming	Java Python Bash Scripting Git Version Control	Proficient Basic Basic Intermediate
Operating Systems	Unix / mac OS Windows XP,7,8,10	Proficient Intermediate
Non-technical Skills	Project Management Writing/Publications	Intermediate Basic

LANGUAGE PROFICIENCY

Spoken	English – fluent; Mandarin – fluent
Written	English – competent; Chinese – average

APPENDIX A

Degree: Bachelor of Computing (Honors) in Information Systems
Cumulative Average Point: 4.27 / 5.00

Course Description	Grade
Development Projects	
Strategic IT Applications	A-
Database Systems	A-
Enterprise Systems Development Concepts	B
NUS Orbital Program (Intermediate) *	CS
Enterprise Systems Development Project	In Progress
Programming Modules	
Programming Methodology (Java)	A-
Requirements Analysis and Design	A-
Data Structures and Algorithms	A-
Discrete Structures	B+
Calculus for Computing	B+
Other Relevant Modules	
Cyber Security	B+
Business and Technical Communication	A-
Financial Accounting	B+
Computing and Society	A
Critical Thinking in the Information Age	B+
Enterprise Resource Planning Systems	In Progress

* **The National University of Singapore Orbital Program** is the School of Computing's 1st year summer self-directed, independent work course consisting of structured peer evaluation, critique and presentation milestones over the summer period.

The Levels of Achievement are differentiated as follows:

- Vostok (Beginner)
- Project Gemini (Intermediate) **(Level attained)**
- Apollo 11 (Advanced)

The **Enterprise Systems Development Project** requires students to work (in development teams) through a complete Systems Development Life Cycle to develop an enterprise-grade business information system. Emphasis is placed on requirement analysis, system design, user interface design, database design and implementation efficiency. Students will be assessed based on their understanding and ability to apply software engineering knowledge on a **real-life application system**.

The Project I am currently working on(as front-end developer) is a Food & Beverage enterprise system which consists of:

- Outlet Management System
- Customer Facing Web Portal (For online deliveries and reservations)
- Customer Facing Mobile App (Built with Ionic Framework)
- Powered by Microsoft Azure

NUS Grading Scale:

A (5.0); A- (4.5); B+ (4.0); B (3.5)

CS = Completed Satisfactorily;

APPENDIX B: Testimonial from RisingGreens Technologies

LETTER OF REFERENCE - WONG TENG KIAT

September 25, 2016

To whom it may concern,

Wong Teng Kiat was an intern at Risinggreens Technologies from October 2015 to January 2016.

During his internship, Teng Kiat worked with the development team as a front-end developer. He was tasked to take charge of one of the features in the online platform. He handled his responsibilities with diligence and a strong drive for success. Teng Kiat is detail oriented and passionate about his work. He showed that he was able to balance his time between his studies and internship well.

As a freshmen back then, Teng Kiat demonstrated great initiative to identify problems and devise solutions. He showed a firm foundation of technical skills surpassing the expectations for a Year 1 student, and displayed creativity when solving problems. He also came with a right mindset, expressing great enthusiasm to learn, and was comfortable picking up new technologies and skills when necessary. Teng Kiat is a dedicated and humble worker who is open to advice and constantly seeks to improve his work.

Teng Kiat was able to work and mix well with our small team. He handled changes in task requirement easily and quickly. Apart from his competency in work, his outgoing and bubbly personality also makes him an easy person to work and hang out with. I believe his positive and driven attitude will be an asset to his peers and colleagues. I am happy to recommend Teng Kiat for the programme and hope you will give his application favorable consideration.

Best regards,

A handwritten signature in black ink, appearing to read "Rax Suen", with a stylized flourish at the end.

Rax Suen
